

Speedy Cleaning

Clean Plus — Subscription Cleaning Platform

Muscat, Oman · Full-stack web product · 2026

Live: <https://clean-plus1.netlify.app>

About the Project

Speedy Cleaning (Clean Plus) is a bilingual (Arabic / English) subscription platform for home cleaning services in Muscat. Customers browse packages, book recurring visits, pay online or by bank transfer, and manage their account. Admins run operations from a full dashboard: orders, schedule, customers, analytics, AI assistant, and invoice generation.

Problem & Solution

- Problem: Cleaning businesses rely on WhatsApp/phone for bookings — hard to track, schedule, and collect payments.
- Solution: End-to-end web app — public booking site + customer profiles + admin ops dashboard + Stripe payments + email/SMS OTP auth.

Key Metrics / Scope

Market	Muscat home cleaning
Languages	Arabic + English (RTL)
Auth	Email OTP + Google + Phone SMS
Payments	Stripe + bank transfer
Hosting	Netlify + Neon Postgres

Customer Features

- Bilingual landing page with live packages from the database
- Multi-step booking flow: package ! schedule ! area ! payment
- Subscription management and order history on the profile page
- Secure signup / login: email + password with OTP verification
- Google OAuth and Oman phone OTP (Twilio Verify)
- Stripe Checkout for cards; bank transfer fallback
- Email confirmations and PDF invoices

Admin Dashboard

- Orders pipeline: pending ! confirmed ! active ! completed / cancelled
- Package CRUD with featured flags and sort order
- Customer directory linked to Neon Auth users
- Schedule calendar (react-big-calendar) for visits and events
- Analytics charts (Recharts) and site visit tracking
- AI assistant (Gemini) for support / content help
- Content studio & WhatsApp message templates
- Team roles and settings

Security & Reliability

- Neon Auth (Better Auth) with email verification OTP
- Webhook signature verification (Ed25519) for Neon Auth & Stripe
- Rate limiting (Upstash Redis) on OTP and sensitive APIs
- Cloudflare Turnstile-ready bot protection hooks
- Internal API secrets for server-to-server email/PDF jobs

Tech Stack

Frontend	Next.js 16 (App Router), React 19, TypeScript, Tailwind CSS 4, shadcn/ui
Backend	Next.js Route Handlers, Drizzle ORM, Neon Serverless Postgres
Auth	Neon Auth (@neondatabase/auth), Google OAuth, Twilio Verify SMS
Payments	Stripe Checkout + webhooks; OMR! USD conversion
Email / SMS	Resend + Neon Auth email; Twilio Verify
AI	Google Gemini for admin assistant
Deploy	Netlify, Neon (us-east-2), env-based config

Architecture (simplified)

```
Browser (AR/EN UI) !' Next.js on Netlify
!
API routes !' Drizzle !' Neon Postgres (app tables + neon_auth)
!
Neon Auth · Stripe · Resend / Twilio · Gemini
!
Webhooks: /api/webhooks/neon-auth · /api/stripe/webhook
```

Role & Delivery

- Designed and built as a production SaaS-style product for a local cleaning brand
- Owned full stack: UI, auth, booking, payments, admin ops, emails, and deploy
- Bilingual UX with RTL support for Arabic-first customers in Oman
